

### QUICK LINKS

The quick links bar is a mechanism that allows for immediate transition to a particular point of a website.

This site includes the following links are in the header of each site:

- **skip navigation** - This link allows direct transition to the contents of the current Web
- **menu** - This link allows direct transition to the main menu (Home, Company, Services, etc.)
- **settings** - This link allows direct formulation of the show website for further satisfaction or convenience of users, for example, people with disabilities using assistive technologies

### ACCESS KEYS

This site includes access keys (combinations keys) that allow 'jumping' to specific sections of the website through the keyboard. This feature is in particular, including the blind and visually impaired users who are unable to handle the mouse.

Each of the above quick links can be activated at any time via the following shortcut keys:

- (M) - Menu
- (S) - Skip to navigation
- (A) - Return to the top of the page

Moreover, for further convenience of the users, the following access keys allow jumping to other key pages of website:

- (0) - Link to the detailed description of the access keys (this page)
- (1) - Home
- (2) - News
- (3) - Sitemap
- (4) - Search

In most browsers the user activates the access keys by pressing *ALT* (in Windows) or *Ctrl* (on Mac). However, as shown in detail below, key combinations differ depending on the browser:

### Internet Explorer

Press and hold *ALT*, press the number or letter of the corresponding link fast navigation, release both keys and then press *ENTER*.

Example: To access the page content should hold press *ALT*, press the letter 'S', to release both keys then press *ENTER*.

### Netscape

Hold press *ALT* and press the number or letter of the corresponding link speed navigation and go automatically to the relevant section.

Example: To access the page content should hold press *ALT* and press the letter 'S' .

### Firefox

Hold down *ALT* and press the number or letter of the corresponding link speed navigation and go automatically to the relevant section.

Example: To access the page content should hold press *ALT* and press the letter 'S'.

### Opera

Press *SHIFT* and *ESC* to activate the rapid navigation using links. Then press the number or letter of the corresponding link speed navigation.

Example: To access the page content must first press the keys with *SHIFT* and *ESC*. Then you must press the letter 'S'.
